

SUCCESS

Success is not an accident; it is hard work, perseverance, learning, sacrifice and most of all, Love for what you are doing.

I personally never lost belief in myself, but I was totally afraid of failure but I knew what I wanted to do.

I have learnt a few principles that I base my life on, the biggest of them is very simple; if you keep moving and never give up then you will always arrive where you want to be.

This is a fact, success is a choice and verily happiness is a choice.

I assure you that there is no magical reason why I'm where I'm and there is absolutely no reason why you can't be where you want to be in life.

If it can happen for me, it can happen for you too. This is how I approach success always; even if it takes time, remember to push and you will reach the top.

Believing that something wonderful is about to happen has taught me that pretending to be average will limit me in many ways.

Big things are in store and can be achieved.

If you want to move a mountain, begin by carrying away small stones.

Relate to this in your life.

Every little thing you do every day adds up to something big.

Take little steps everyday towards your big goal.

Do small things in great ways, if opportunity doesn't knock, then build a door.

Have desire and you will achieve.

Never be afraid of storms in your life Just learn to sail your ship, so wherever you go and no matter the weather always bring your own sunshine.

Never quit because that only lasts forever.

Be determined, your dream is not too small, work on it.

Be a hero and a great African leader.

Good leaders are trailblazers; they make a path for others to follow.

Inspire people around you, dream bigger and achieve greater.

Successful leaders see the opportunities in every difficulty rather than the difficulty in every opportunity.
